

Therma-Coat - Thermal Coating Primer

Therma-Coat has been designed to be used in conjunction with Underfloor Heating.
Reduce heat loss by up to 20%.

It is the only Underfloor Heating Thermal Coating Primer on the market today.
Designed to increase efficiency of underfloor heating.

- Insulates and seals in one
- Reduces running costs
- Reduces warmup time
- Reduces energy Loss by up to 20%
- +2°C with the same energy
- Helps reduce your carbon footprint
- Lifetime Guarantee
- Suitable for most surfaces
- Multiple coats for greater efficiency
- Available in 1Ltr Containers, Covering up to 16sqm
- Paint or Roller onto the floor
- Thermal Paint / Primer
- Simple to apply

Independent tests show increased temperatures of 2 degrees celsius when using Therma-Coat with underfloor heating of identical power outputs.
